# TEACHING NOTES

## OBJECTIVES:

- To find and use information for a purpose using the internet.
- To interpret and compare data

## Cross Curricular Links: ICT, Maths, Literacy

The template above can either be printed and used as a paper copy or imported onto a computer program to be edited by the children.

The aim is for children to create their own football cards for players. This can be used purely for information to make a class book or display or they can be made into cards and used like Trump cards. This resource could be used in the run up to Euro 2012 focusing on players from teams taking part.

Children need to use the internet to find the information they are looking for.

## Teams taking part can be found on:

<http://www.uefa.com/uefaeuro2012/teams/index.html>

Click on relevant country and then onto squad to find out details of players

[www.thefa.com](http://www.thefa.com) is a good website with lots of information about England players.
