OBJECTIVES:

- To extract and interpret data
- To compare data

Cross Curricular Links: ICT

This worksheet can be used to reinforce previous data handling learning. As a warmer the teacher could do a mini survey of favourite sports in the class on the board using a tally chart. Ask children how many more children like football than swimming etc. Children can complete the worksheet independently. As an extension they can transfer certain data into a bar chart either on paper or using a simple program on the computer to be displayed in the classroom.
